PROJECTS

Full-Stack Job Search SaaS Application | GitHub Code: github.com/alexmexico1

Tech Stack: Node.js, Express.js, MySQL, REST API, Tailwind CSS

- Built a web app for posting, searching, and managing job applications.
- Designed relational MySQL database schemas with foreign keys to link users, jobs, and applications.
- Created REST API endpoints for user authentication and application submissions.
- Styled the user interface with Tailwind CSS for mobile and desktop screens.

E-Commerce Web Application (MERN Stack) | GitHub Code: github.com/alexmexico1

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT

- Built an e-commerce platform with product filtering, cart management, and user accounts.
- Implemented JSON Web Token (JWT) and password hashing to secure login routes.
- Built full CRUD functionality to allow admins to add, edit, and delete products from MongoDB.
- Handled application state using React Context to prevent broken UI re-renders.

Next.js Web Application | GitHub Code: github.com/alexmexico1

Tech Stack: Next.js, React, Tailwind CSS, Vercel

- Developed a web application using Next.js Server-Side Rendering (SSR) for fast loading times.
- Integrated external APIs to load dynamic data on the client side.
- Configured automated deployment from GitHub to Vercel.
